**A capacitated general routing problem on mixed networks**

Pandit, Ram; Muralidharan, B

Computers & Operations Research v22n5 pp: 465-478

May 1995

**CODEN:** CMORAP

**ISSN:** 0305-0548 **Journal Code:** CRO

**Document Type:** Journal article **Language:** English **Length:** 24 Pages

**Special Feature:** Charts Diagrams Appendix Equations References

**Abstract:**

An examination is made of the problem of routing vehicles over the specified segments of a mixed network. The routing problem is modeled as a Capacitated General Routing Problem (CGRP). The solution to the problem is a set of routes for the vehicles that are consistent with the capacity and work-hour constraints. For the CGRP, a heuristic procedure is presented to solve for large size problems. Both route-first-partition-next and partition-first-route-next approaches are discussed. Computational results of the developed procedure are presented.

**Descriptors:** Operations research; Routing; Transportation; Heuristic; Decision support systems; Studies

**Classification Codes:** 2600 (CN= Management science/Operations research); 5160 (CN= Transportation); 5240 (CN= Software & systems); 9130 (CN= Experimental/Theoretical)
